Accessing AWS Console from NuvePro

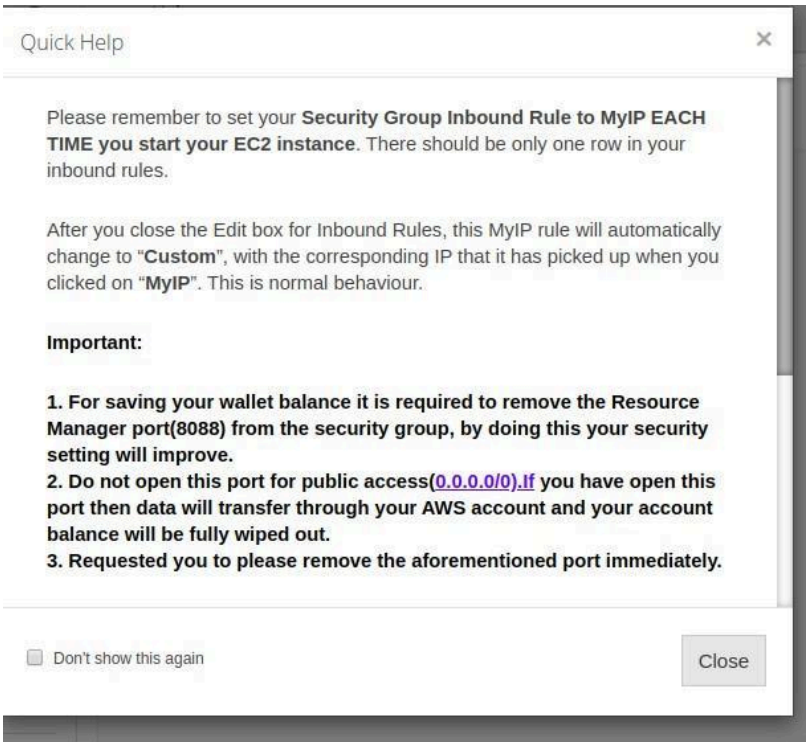

1. Open the Nuvepro URL provided to you. You will see a Sign-In page below. Fill in the username and password provided to you.

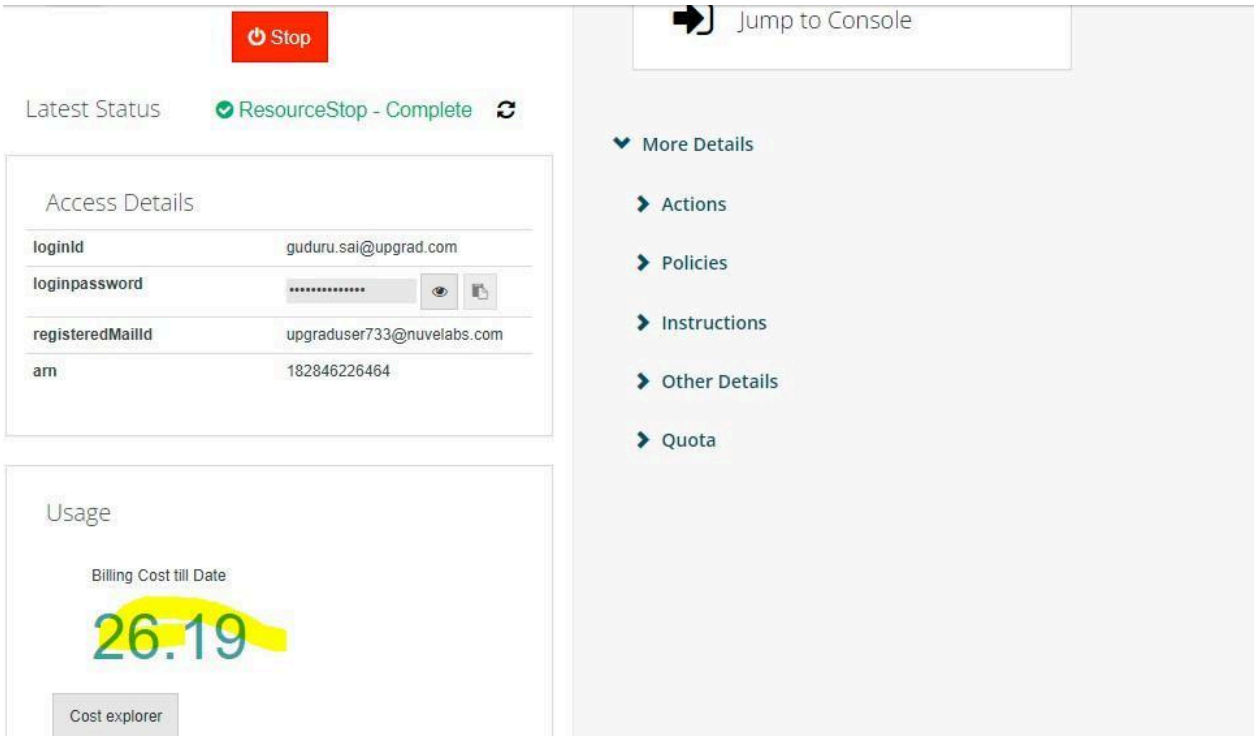

2. You will see the home page below. Click on the **View Lab** button to access your lab.

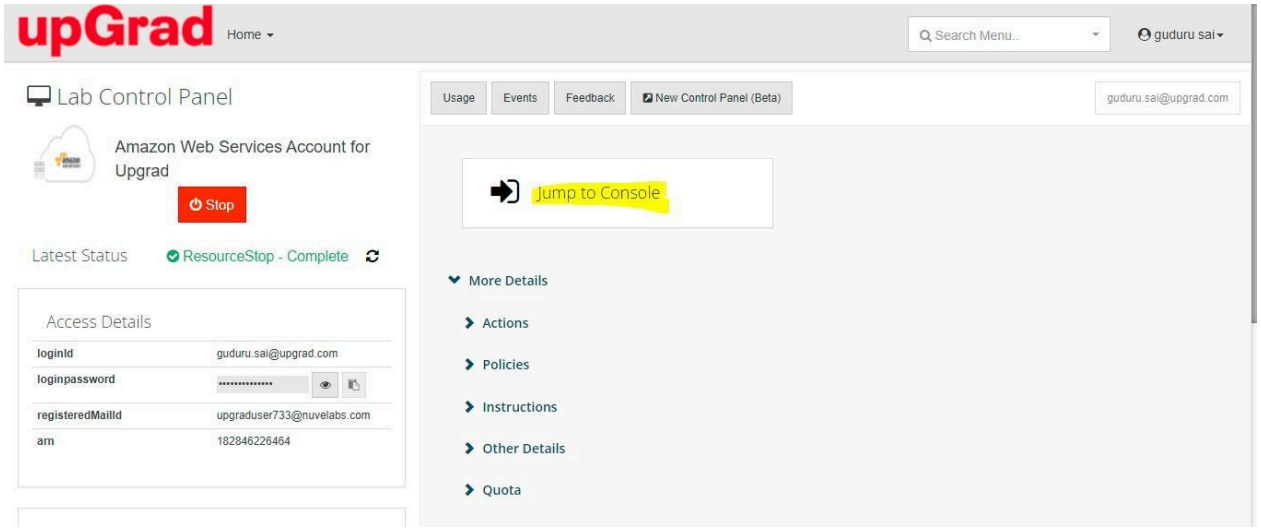

3. The following window will pop up, read these instructions carefully, you have to follow them once you set up your AWS instance. For now, click on **Close**

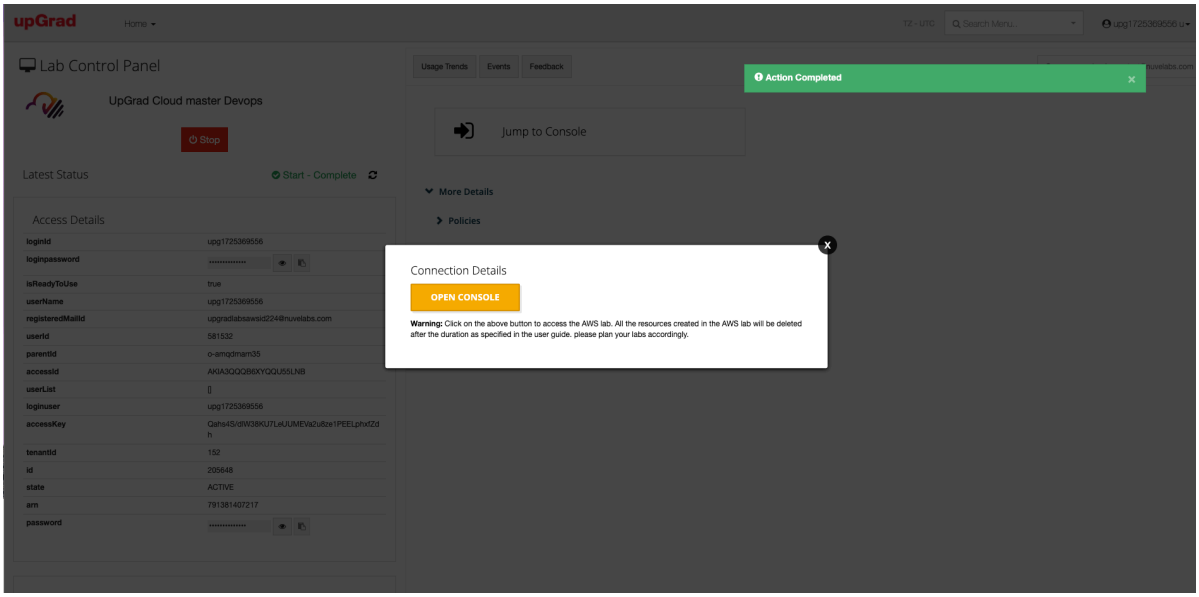

The Nuvepro dashboard will open up. Here you can monitor your 'Billing cost(**$**) till date' (Bottom left)

4. To open the AWS console, you need to click the **Jump to Console** button.

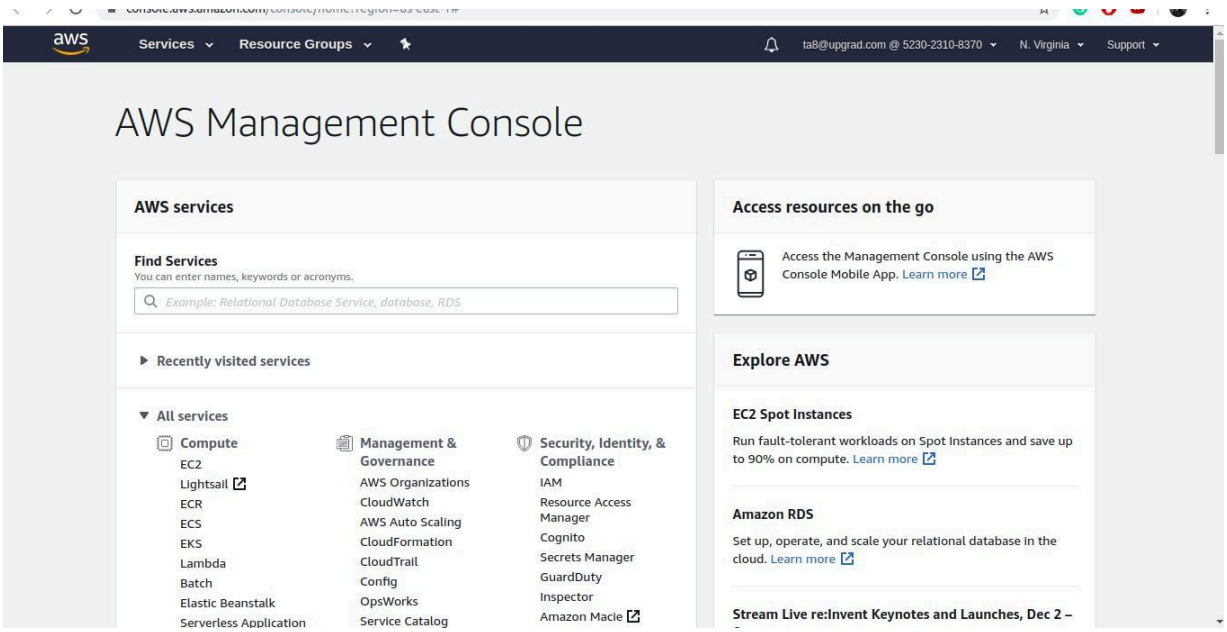

5. Click on **Open Console**

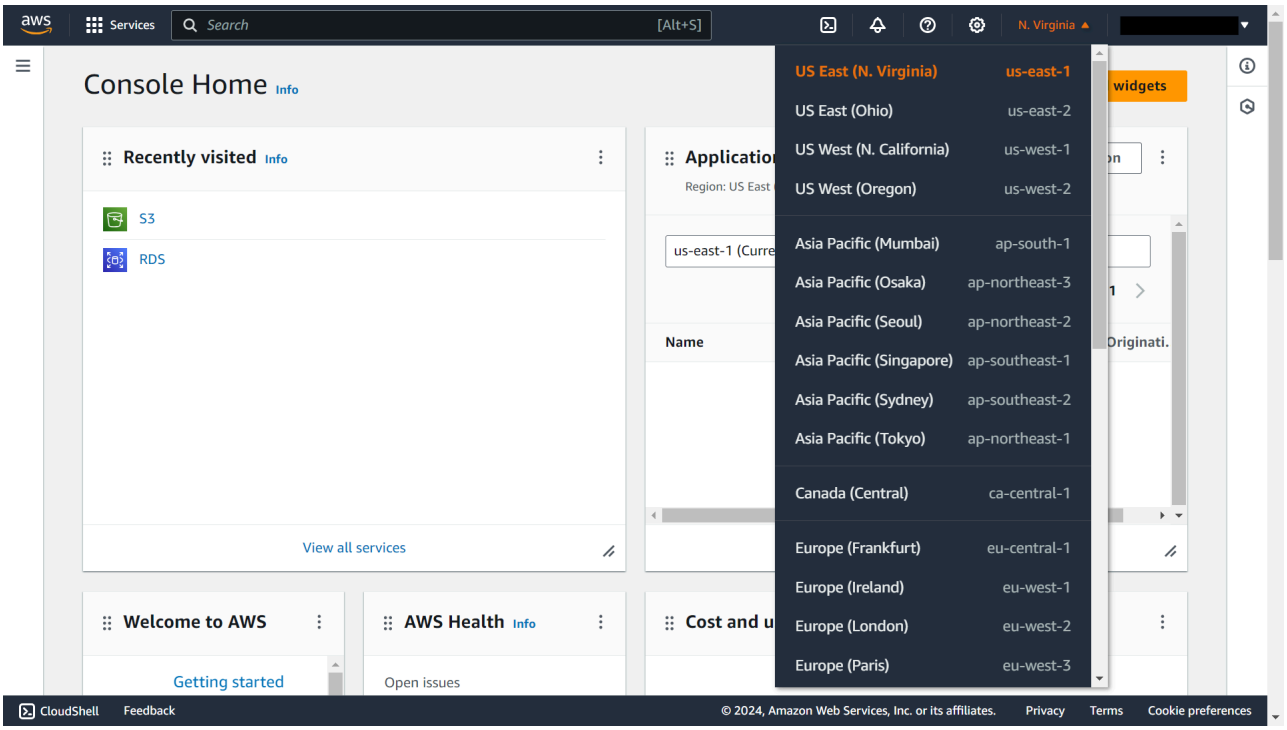

Note: It may take some time (up to 3 hours) to activate your AWS account after clicking the "Jump to Console" button for the first time. Please contact your student mentor if you cannot access your AWS dashboard even after 3 hours.

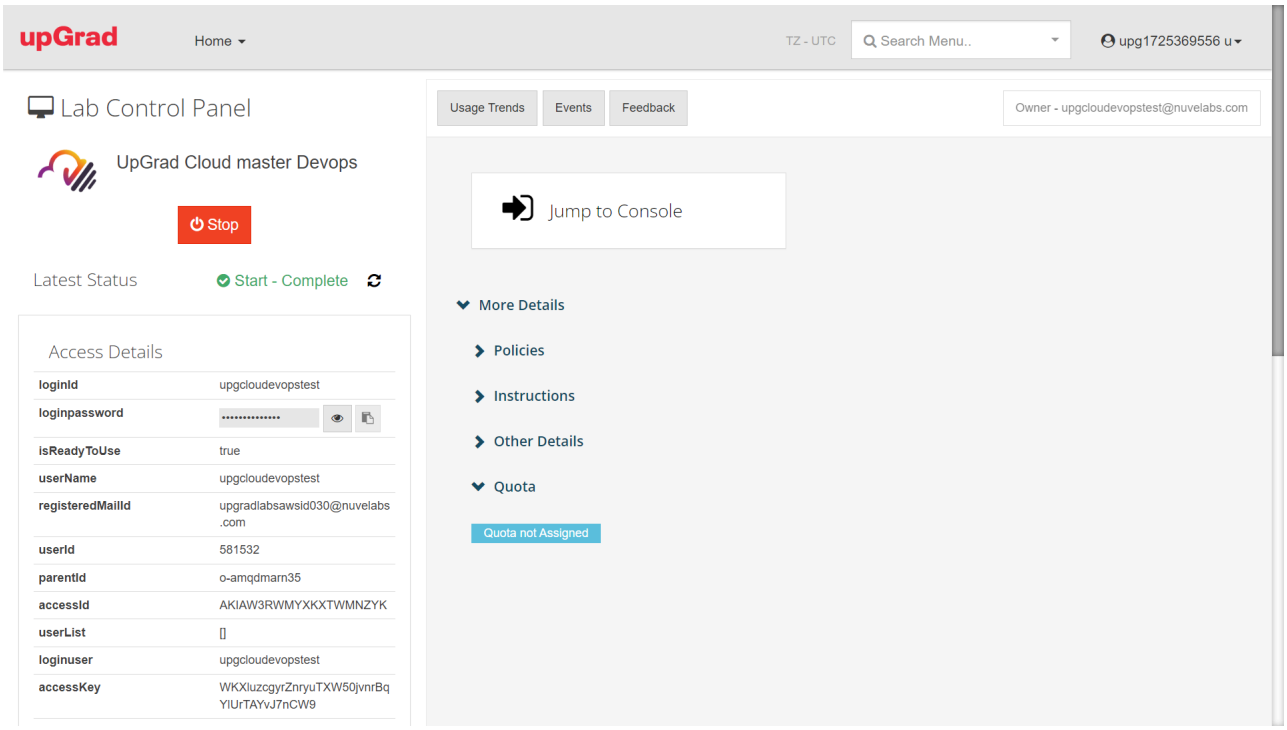

Once it is done, you will see the AWS management console below.

6. The services used in this lab will be activated in **us-east-1** or **US East (N. Virginia)**. Select this option if it has not already been selected.

7. Once done with the labs, click on the red stop button to prevent using the remaining credits.

Note:

1. Do not tamper with any keys in the IAM section of the AWS sandboxed environment. You will not be able to launch the labs again.
2. These labs have limited credits. Please use these labs wisely.
3. You must use these labs only to practice and make projects given to you by us and the subject matter experts, not for any other activity.
