Guidelines for group presentations – Data Governance and Ethics (H9DGAE)

The presentations should follow the suggested format and address the following:

Presentations will typically consist of 20-30 slides (based on your topic/paper) and should follow the suggested format given below:

For all

- Presentations should last 20-25 minutes maximum (followed by 5-10 mins Q&A)
- Introduction – explaining the significance of the topic and relevance to class subject matter.
- Identify the important issues and questions raised by the paper. Bring attention to key insights throughout your document highlighting the most important information and effectively using diagrams and/or other figures.
- Identify, interpret and discuss at least 3 topics pertaining to the papers content (concepts, content, frameworks, implications, challenges, risks, etc., Provide an example from the paper for each of the discussion topics explained and its relevance.

Provide a conclusion - summarize a scholarly response to the work and try to identify the author's critical approach.

For Analysis of papers

- Start with an introduction to the paper (who did it?, in what context?, problem addressed?, relevance more generally?)
- Give an overview of the paper contents (objectives, methods, issues raised, conclusion)
- Provide a summary of relevant sections For Case Studies
- Present the case study scenario (highlighting the main aspects [relevant to the course-related content])
- Present the questions of the case study and provide your answer
- Present the case study analysis (what was done wrong, what was done right, what could have been prevented/improved)

For Investigations

- Describe what the incident/event was about, why it is infamous, present a timeline of events
- Present your critical analysis about the main aspects relevant to the course-related content
- Present the context (what was the example about, timeline of events, what was done wrong (issues identified), what was done right, consequences, how it could have been prevented/improved)

Grading:

1. The presentations will be marked according to the following criteria (**Total marks: 50**)
    a. **<u>Content and Organization (15)</u>** : This criterion assesses the quality and structure of the presentation, including how well the content is organized and presented. The following aspects can be considered:
        i. The presentation's structure and organization
        ii. The quality of the information presented
        iii. The level of depth in understanding of the topic

    b. **<u>Presentation Skills (10)</u>**: This criterion assesses the group's delivery of the presentation, including how well they communicate and engage with the audience. The following aspects can be considered:
        i. Clarity and coherence of delivery
        ii. Voice projection, pace, and intonation

    c. **<u>Analysis and Evaluation (10)</u>** : This criterion assesses the group's ability to analyze and evaluate the data governance and ethics topics presented. The following aspects can be considered:
        i. The depth of analysis and evaluation of the topic
        ii. The ability to identify and analyze ethical and governance issues

    d. **<u>Teamwork and Collaboration (10)</u>** : This criterion assesses the group's ability to work together as a team and collaborate effectively. The following aspects can be considered:
        i. Contribution and participation of all group members
        ii. Cooperation and communication among group members

    e. **<u>Time Management (5)</u>** : This criterion assesses the group's ability to manage their time effectively during the presentation. The following aspects can be considered:
        i. The ability to adhere to the time limit for the presentation
        ii. The ability to distribute speaking time among group members equally
