PROFILE

- Experienced R&D Cloud Engineer Specialist with 3 years at Dassault Systèmes, skilled in CI/CD automation, AWS cloud infrastructure and Infrastructure as Code (Terraform, Ansible)
- Proven ability to optimise workflows, enhance team collaboration, and deliver robust cloud solutions
- Seeking to leverage expertise in a dynamic engineering team

TECHNICAL SKILLS

- **AWS:** EC2, S3, Lambda, VPC, IAM, Route 53, CloudWatch, ECS, EKS, ECR, RDS, DynamoDB, Elastic Load Balancer (ELB/ALB), Target Groups, Security Groups, NAT Gateway
- **Infrastructure as Code & Config Management**: Terraform, Ansible
- **CI/CD & Containers**: GoCD, GitHub Actions, Docker, Kubernetes, Jenkins
- **Scripting & Languages**: Python, C, Node.js, JavaScript, SQL, PowerShell
- **Tools & Operating Systems**: Windows, Git, GitHub, Visual Studio Code

PROFESSIONAL SUMMARY

R&D Cloud Engineer Specialist | Dassault Systèmes Solutions Lab Private Limited | Pune, India, July 2022 – August 2025

- Designed and automated cloud infrastructure using Terraform and Ansible, enhancing scalability and eliminating manual provisioning efforts.
- Architected and configured secure AWS environments, supporting 50+ EC2 instances and managing 10+ VPCs
- Automated CI/CD workflows by developing Python scripts and AWS Lambda functions, improving deployment efficiency by 30%
- Containerised applications using Docker and orchestrated deployments on Amazon ECS, leveraging internal platforms (Medistrano, Cyclops UI, Ansible Tower) for streamlined operations.
- Implemented comprehensive monitoring and logging with Amazon CloudWatch to gain visibility into system health and performance metrics.
- Conducted knowledge-sharing sessions on containerization and DevOps methodologies, mentoring junior engineers to uplift team capabilities.

Intern | PepCoding Pvt Limited | Delhi, India, January 2021 – July 2021

- Gained hands-on experience in the full software development lifecycle, including designing, coding, testing, and deploying web applications.
- Applied full software development lifecycle knowledge to independently build and deploy multiple responsive websites from scratch.
- Developed and launched front-end projects using HTML, CSS, and JavaScript, with all source code version-controlled on GitHub.
- Created a public project portfolio by demonstrating completed website demos on LinkedIn, showcasing practical front-end development skills to a professional audience.

EDUCATION

Master of Science in Cloud Computing | National College of Ireland | Sept 2025 – Nov 2026
Key Modules: Cloud Computing, Cloud DevSecOps, Blockchain, Cloud Platform Programming

Executive PG Certificate in Cloud Computing & DevOps | International Institute of Information Technology, Bangalore | Sept 2024 – May 2025

B.Tech, Computer Science & Engineering | Noida Institute of Engineering and Technology | May 2018 – July 2022

PROJECTS

GoCD Server Migration and Deployment | March 2024 – August 2024

- Built an automated rebuild process using Terraform, Ansible, Python and AWS CLI, allowing the entire GoCD server, including all pipelines, configs, and the database, to be brought back online in under 7-8 minutes if the main server ever goes down.
- Led the end-to-end migration of a production GoCD server to a new AWS instance, ensuring minimal downtime.

Cerebro Script Adaptation and Containerization | May 2023 – Sept 2023

- Modernised a legacy PowerShell script (Cerebro) by adapting it for cross-platform compatibility using PowerShell Core (PWSH).
- Containerised the application using a multi-stage Docker build**,** which reduced the final image size by **60%** and cut deployment time by **50%**.
- Developed a multi-stage Docker file to containerise the application, resulting in optimised, portable, and efficient deployments.

Cancer Probability Detection using Statistical Data | Dec 2022 – Feb 2022

- Designed and implemented an Amazon ECS deployment pipeline for a machine learning project focused on cancer probability prediction.
- Ensured the pipeline was scalable and reliable, collaborating with the data science team (TwinOnco) to align the deployment strategy with the application architecture.

CERTIFICATION

- HashiCorp Certified: Terraform Associate (003) **| January 19, 2025**
- GitHub Actions for CI/CD**, LinkedIn Learning | January 14, 2024**
- Programming for Everybody (Getting Started with Python)**, University of Michigan (Coursera) | December 27, 2020**

INTERESTS AND ACHIEVEMENTS

- Badminton: **Active member of the National College of Ireland (NCI) team, enjoying weekly practice and inter-collegiate matches.**
- Sprinting: **Former 100m and relay racer during my school years, I still have a passion for athletics.**
