***Abstract*—This document is a model and instructions for LaTeX. This and the IEEEtran.cls file define the components of your paper [title, text, heads, etc.]. *CRITICAL: Do Not Use Symbols, Special Characters, Footnotes, or Math in Paper Title or Abstract.**

***Index Terms*—component, formatting, style, styling, insert**

I. Introduction

Introduction – motivation for your project and its main objectives. A brief description of your application.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nulla congue at elit eu sodales. Etiam placerat eros ex, a finibus magna ullamcorper vel. Sed tincidunt sapien vitae ex bibendum, eget vestibulum nunc tincidunt. Nulla commodo ac justo mattis condimentum. Fusce molestie quam sit amet leo rhoncus, nec finibus justo semper. Suspendisse vel ante ante. Cras sit amet nisl nec nulla pulvinar porta. Donec et tellus sem. Fusce vestibulum a magna vel dapibus. Nunc luctus ipsum sed dui sollicitudin, a ornare odio semper. Nam vel metus a dui aliquam maximus. Vestibulum ac euismod orci. Nullam eu ullamcorper quam, nec ornare augue. Ut vitae odio id nulla malesuada malesuada. Etiam convallis velit in felis tempor vestibulum. Suspendisse bibendum lacinia sapien vitae ornare.

II. Continuous Integration, Continuous Delivery and Deployment

Continuous integration, continuous delivery and deployment of your application.

Ensure that this section includes the following:

- Document the CI/CD pipeline including a diagram of the entire workflow; the diagram should indicate where the different tools/cloud-based services are used to support the CI/CD pipeline, and the relationships between these services/tools. Ensure that you distinguish between the CI and CD in the diagram. The diagram should be fully explained in text. **Note that the diagram should be created by you based on the pipeline and stages you set up for your project.**
- Include the URL to your deployed application e.g., google.com.
- Document the CI/CD pipeline in action – document how a change in the source code of your application flows through the pipeline. Ensure that you include relevant screenshots of the pipeline you set up for your project that capture that code change flow, together with all the commands used. **Note**: At all times you must use a **private repository** for versioning control (e.g., GitHub, Bitbucket, etc.)

TABLE I
This is a Table

Col1	Col2	Col2	Col3
1	6	87837	787
2	7	78	5415
3	545	778	7507
4	545	18744	7560
5	88	788	6344

To reference any figure, use this “Figure 1”; it automatically generates the number according to the label.

Figure 1 presents a column-width plot.

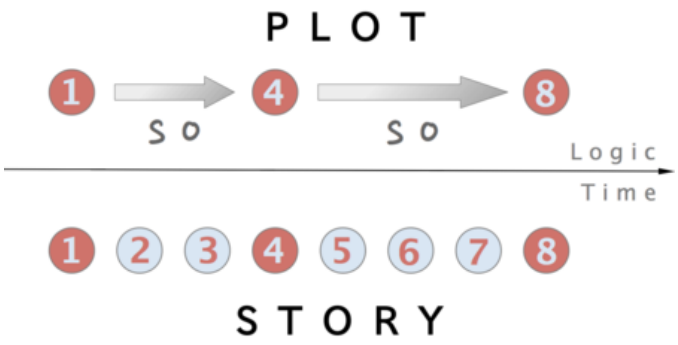

Fig. 1. This is an image, scaled at column size

Figure 2 presents a **full-size** plot.

Please note one can refer to an image/figure/diagram in the text which is exemplified by Figure 2 but also by Figure 1.

Let us introduce a reference to exemplify its use here [1], and this is the new reference from IEEE [2]. A good article is also here [3].

Table I is a good starting point to summarise findings.

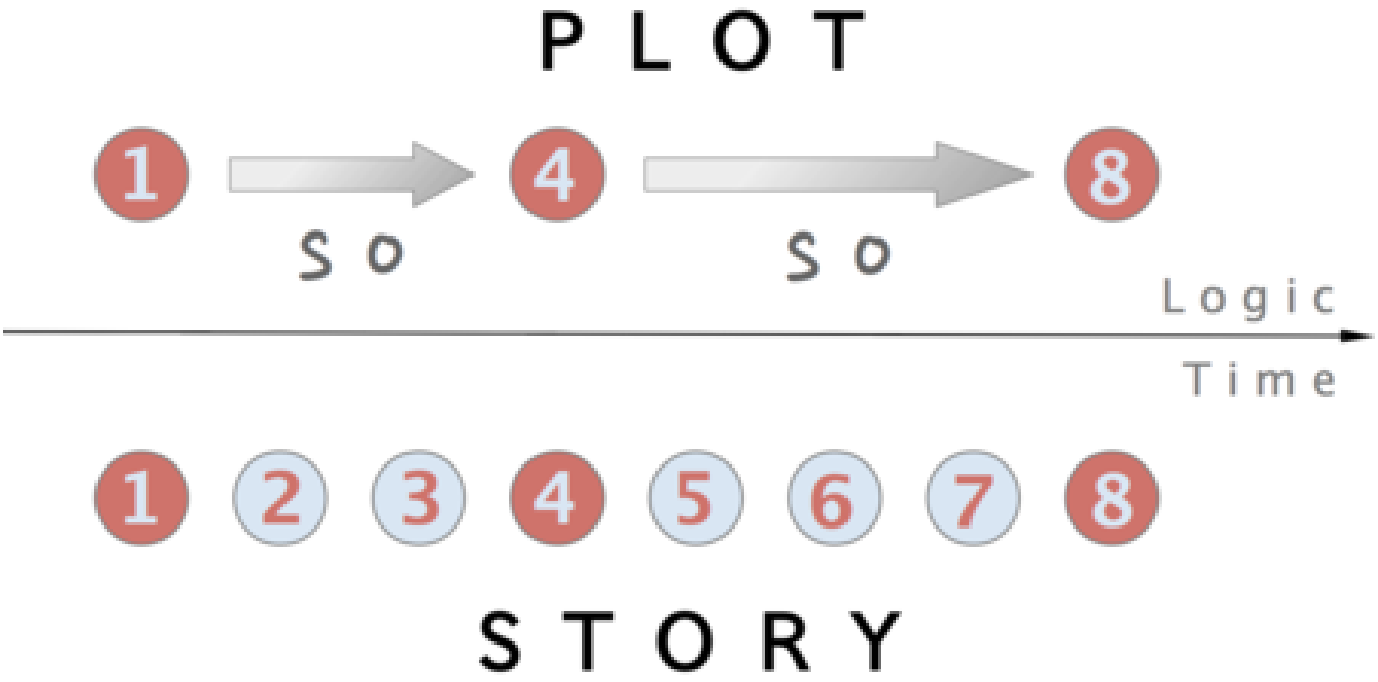

Fig. 2. This is an image at full size

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nulla congue at elit eu sodales. Etiam placerat eros ex, a finibus magna ullamcorper vel. Sed tincidunt sapien vitae ex bibendum, eget vestibulum nunc tincidunt. Nulla commodo ac justo mattis condimentum. Fusce molestie quam sit amet leo rhoncus, nec finibus justo semper. Suspendisse vel ante ante. Cras sit amet nisl nec nulla pulvinar porta. Donec et tellus sem. Fusce vestibulum a magna vel dapibus. Nunc luctus ipsum sed dui sollicitudin, a ornare odio semper. Nam vel metus a dui aliquam maximus. Vestibulum ac euismod orci. Nullam eu ullamcorper quam, nec ornare augue. Ut vitae odio id nulla malesuada malesuada. Etiam convallis velit in felis tempor vestibulum. Suspendisse bibendum lacinia sapien vitae ornare.

Proin nulla nunc, pretium nec magna vitae, elementum consectetur nibh. Fusce vel interdum orci, posuere feugiat nisl. Nullam faucibus blandit nibh, vitae tempor lorem convallis eget. Nullam nec lectus quis nisl feugiat mollis. Ut pharetra mollis lacus vitae placerat. Suspendisse in nunc ex. Duis lorem ante, commodo vitae augue vel, volutpat auctor metus. In varius imperdiet porttitor. Integer mi nisl, ornare vitae sollicitudin quis, pellentesque sit amet ligula. Suspendisse in dolor in enim lobortis placerat eu quis tortor. Ut ornare diam mattis purus laoreet, in pharetra purus mollis. Cras semper, mi ac tincidunt fringilla, enim lorem iaculis orci, quis tempor leo eros quis sem.

III. Static Code Analysis and Security Vulnerability Analysis

Critically analyse and document the approach you took for performing static code analysis, including security vulnerabilities analysis. Document your findings from performing static code analysis and security vulnerabilities analysis, together with their fixes.

Curabitur suscipit leo magna, sed elementum ligula bibendum id. Aenean congue eu turpis consectetur ullamcorper. Proin scelerisque, justo eu gravida faucibus, turpis dui convallis nisl, nec rhoncus felis justo non turpis. Pellentesque sollicitudin sem tempus lacus hendrerit molestie. Aliquam nec convallis elit. Nullam ante sapien, pharetra eget gravida vitae, accumsan et lacus. Sed quis porttitor odio, sed semper

est. Aenean in vestibulum risus. Vivamus vitae blandit metus. Nulla turpis quam, ultricies sed congue vitae, vulputate sit amet orci. Nulla facilisi. Suspendisse vel felis bibendum, finibus dui vel, sollicitudin est.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nulla congue at elit eu sodales. Etiam placerat eros ex, a finibus magna ullamcorper vel. Sed tincidunt sapien vitae ex bibendum, eget vestibulum nunc tincidunt. Nulla commodo ac justo mattis condimentum. Fusce molestie quam sit amet leo rhoncus, nec finibus justo semper. Suspendisse vel ante ante. Cras sit amet nisl nec nulla pulvinar porta. Donec et tellus sem. Fusce vestibulum a magna vel dapibus. Nunc luctus ipsum sed dui sollicitudin, a ornare odio semper. Nam vel metus a dui aliquam maximus. Vestibulum ac euismod orci. Nullam eu ullamcorper quam, nec ornare augue. Ut vitae odio id nulla malesuada malesuada. Etiam convallis velit in felis tempor vestibulum. Suspendisse bibendum lacinia sapien vitae ornare.

Proin nulla nunc, pretium nec magna vitae, elementum consectetur nibh. Fusce vel interdum orci, posuere feugiat nisl. Nullam faucibus blandit nibh, vitae tempor lorem convallis eget. Nullam nec lectus quis nisl feugiat mollis. Ut pharetra mollis lacus vitae placerat. Suspendisse in nunc ex. Duis lorem ante, commodo vitae augue vel, volutpat auctor metus. In varius imperdiet porttitor. Integer mi nisl, ornare vitae sollicitudin quis, pellentesque sit amet ligula. Suspendisse in dolor in enim lobortis placerat eu quis tortor. Ut ornare diam mattis purus laoreet, in pharetra purus mollis. Cras semper, mi ac tincidunt fringilla, enim lorem iaculis orci, quis tempor leo eros quis sem.

IV. Conclusions

Conclusions including findings/interpretations – what did you learn and find out? Include a short reflection on developing this project. If you were to implement this project again, what would you do differently?

Integer metus ipsum, dignissim id sem lobortis, blandit pretium ligula. Suspendisse sollicitudin accumsan suscipit. Suspendisse iaculis massa eros, nec condimentum urna tincidunt sit amet. Aenean erat augue, commodo eget viverra at, ultricies ut lacus. In at justo vitae massa pharetra suscipit quis ac lorem. Duis ornare sem ac lectus rutrum elementum. Aliquam erat volutpat. Maecenas ornare, dui ac congue congue, orci nunc iaculis ipsum, in iaculis turpis ipsum at ipsum. Curabitur at urna et felis faucibus bibendum. Sed consequat quis est a dictum.
